Employment History

Bootstrap Instructor at AcademyIt
Jul, 2015 - Jun, 2016

www.aparat.com/w3schools

I recorded and published 52 bootstrap 3 tutorial videos and some articles for academyit.net website.

===

Fullstack Developer at DakyaCo
Feb, 2019 – Present

1. Banasher
(Laravel 6, JS, Elasticsearch)

www.banasher.com

It's an online book store. Admins insert data via uploading an excel file, it parses and store them in database.

2. Persian ReCAPTCHA
(Laravel 6, CORS, WordPress Plugin)

Similar to google captcha with a goal to collect a dataset for ORC training.

 Chosen as top 3 team in Vita event and national library.

3. Sarej
(Laravel 6, JS, PHPUnit, TailwindCss)

www.sarej.com

Multi warehouses and multi languages online shop store with ability to assign multiple product variants with different prices and stock number in each warehouse. (Demo)

4. Ketaber
(Laravel 7 modular package, JS, PHPUnit, TailwindCss, Webpack, Sass)

www.ketaber.com

An online book store that implements Conflict-free replicated data types for syncing with core panel. (Demo)

5. Planist
(Laravel 8, Vuejs 2, PHPUnit, Laravel Sanctum, Google API)

www.planist.live

Online appointment scheduler. It connects to your google calendar, find free times and users can book a reservation based on that.

===

Laravel Developer at Digiato

May, 2021 - Present

1. Digiads

www.click.digiato.com

It manages all advertisements for following websites:

- www.digiato.com
- www.vigiato.ir
- www.rooziato.com
- 60% percent faster loading time by creating a built-in script to optimize and convert Gif files and +10 score on GTmetrix.

Education

University of Science and Culture

2014 – 2019

Bachelor of Software Engineering

MFT

2015 – 2016

I have a degree for following subjects from MFT institute.

- Web design I - HTML 5, CSS 3 with Dreamweaver
- Web design II - Responsive Design with Bootstrap
- Web design III - Javascript & Jquery & Ajax

Projects

1. Rating System

(Vanilla PHP with MVC Structure)

www.myrate.usc.ac.ir

I made this project for USC in which professor could do a roll call of students and assign a presentation date for each of them and present students might rate and comment to other's performance.

2. My Website

(Laravel 5.2, JS)

www.amirrezam75.ir

I start learning Laravel by creating a blog for myself.

3. Personal Website

(Bootstrap, JQuery)

www.mrfarzoo.ir

4. Unebuy

It was e-commerce marketplace connecting subscribers with local merchants by offering activities, travel, goods and services in Iran (like Groupon).

Open Source Projects

I've contributed in a few projects like `laravel/framework` and `spatie/laravel-google-calendar`. I love this because it helps me gain a much deeper knowledge about the software.

1. Laracasts Forum

(Laravel 8, Vuejs2, Meilisearch)

github.com/AmirRezaM75/laracasts_forum

Discussion forum for programmers. (Demo)

2. Gif optimizer

github.com/AmirRezaM75/image-optimizer

It's a PHP package to optimize Gif files and convert them to WEBM format.

3. Coursehunter Downloader

github.com/AmirRezaM75/coursehunter-downloader

PHP script to find all course links and download them from coursehunter.net website.
